The component was designed to be used embedded in html or standalone. There can be an unlimited number of items.

The component is highly customizable directly from the xml.

In order to use the component into you projects you must first copy the folder "News Reader 02 by OXYLUS" into your new projects library and drag and drop to the stage the movie clip called "main". It is really easy and you can specify the xml in the flashvars in main.as (xmlOb.load(_root.xmlFile == undefined ? "data.xml" : _root.xmlFile);); you also must copy the source files. You will be able to find this folder and the movie clip once you open the .fla file and the library.

The following variables can be changed in the xml :

1 - totalWidth="640" totalHeight="379" Here you will be able to change the total width and height

2 - bgColor="0x000000" stroke1Color="0x1f1f1f" stroke2Color="0x575757" Here you will be able to change the colors for the main background, the first and second stroke.

3 - bgRadius="6" stroke1Radius="6" stroke2Radius="6" Here you will be able to change the radius of the background, stroke 1 and stroke 2

4 - htmlFieldWidth="300" Here you will be able to change the html field width

5 - stroke1Px="2" stroke2Px="1" This is the stroke's dimension

6 - imageStrokePx="3" This is the image stroke size

7- bgWidth="457" bgHeight="23" Here you can modify the down scrolling list

8 – maskHeight="123" Here you can specify the mask height

9- butHeight="23"   butDistance="2" Here you can modify the button height and the vertical distance between buttons

10 – title="my Title goes here" Here you will be able to change the title which will appear on the small news button and in the big news field

11 - timeInfo="11.05.2008 11:12AM" Here you will be able to change the time which will appear on the small news button and in the big news field

12 - picture="images/1.jpg" Here you will be able to input the picture's address. If the picture cannot be loaded the html field will be resized

13 - toggleLaunchPictureUrl="1" toggleLaunchButtonUrl="1" Here you will be able to toggle on/off the url launching feature for the picture/button

14 - buttonText="Read More" Here you will be able to change the button's text

15 - url="http://www.flashden.net/user/OXYLUS" target="_blank" Here you will be able to change the url and target

16 - <description><![CDATA[Your description will go here]]></description> Here you will be able to change the news big text which is html and css formatted.

Enjoy this brand new release from Oxylus Flash.
